January 11, 2008

To Whom It May Concern:

Steel-Craft Door Products Ltd., first entered into a contract to place an order with Samco Machinery, in August 2006. This purchase order was to custom design and build a fully automated, quick-change roll former, to suit our specific needs. By the time this machine was completed, it would extend through five zones and be the most sophisticated roll former Samco had built to date.

We at Steel-Craft, have experienced an exemplar level of knowledge and experience throughout the entire Samco team. From concept to completion, quoting to engineering of our roll former, everyone at Samco has been terrific to work with. Whether our staff were working at Samco in Toronto, or Samco staff were working with us on-site in our facility, their want to understand any particular issue and solving it, are second to none.

During the process of developing engineering and design solutions the staff at Samco have strived to build and maintain sincere relationships with our team at Steel-Craft. As a direct result of their high level of detail and commitment to our company and our people, we are presently building a second automated roll forming line with Samco Machinery.

Joe Repovs proudly states, " A Samco roll former is worth it's weight in Steel ". We would agree with him.

On behalf of all our staff at Steel-Craft Door Products Ltd., I am equally proud to continue to grow our company with Samco Machinery.

Most Sincerely,

A handwritten signature in black ink, appearing to read 'Kimberly Mihalcheon', written over a horizontal line.

Kimberly Mihalcheon
Executive Director,
Steel-Craft Door Products Ltd.
