To Whom It May Concern:

In my role as Head- Singur Business Unit, I was assigned the responsibility of working with Samco Machinery Ltd for development of critical roll formed automotive components for the Nano car. Samco Machinery was involved as a Supplier of Automotive Roll Forming Lines right from the conceptual stages of the Nano Car project.

The project had a large impact to our business and hence there was pressure to implement quickly. Samco has got a wonderful dedicated working team with sound technical knowledge and commitment to quality. The Project development phase required lot of modifications from our Customer's side. Samco was extremely fast in understanding and implementing those changes wherever necessary. They have demonstrated an ability to quickly understand complex issues and provide innovative and sound solutions. Samco have also got superior internal business processes implemented which helps them to deliver quality products on time. I have personally visited Samco facilities at Canada and was impressed by their working team and the operating procedures followed.

Overall, our organization has been extremely pleased with the business relationship with Samco Machinery Ltd, and I would highly recommend them to other organizations.

Regards

Soumen Mukherjee
